

## Dynamic Video Walls for Higher Education

### COLLABORATIVE WORK AND RESEARCH WITH THE ULTIMATE VISUALIZATION SYSTEM

Haivision MCS [video wall systems](#) are utilized in [colleges and universities](#) across the country. Our comprehensive solutions produce industry-leading visual performance with the most powerful processing and rendering on the market. These capabilities, combined with the industry leading and easy-to-use Command 360 interface, deliver a solution that can enhance research, drive student engagement, or provide dynamic peer collaboration.

Haivision designs and delivers your complete video wall solution - including displays, video processors, software, and more. We will work directly with your organization to develop the system that best meets and exceeds your unique needs and requirements. Your Haivision system will also be fully installed and integrated into your environment by our professional team.

### BENEFITS OF OUR COMPREHENSIVE SOLUTION

- Boosts engagement and collaboration
- Displays massive content at full scale
- Delivers unforgettable presentations
- Supports BYOD
- Provides user-friendly control
- Ongoing support and protection

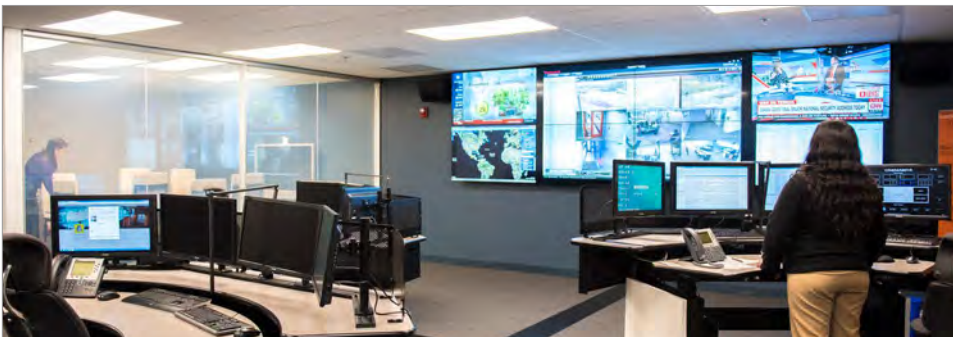

**VISUALIZATION LABS**

With powerful processing capabilities and real-time 3D rendering hardware all accessed directly through the [Command 360](#) UI, Haivision visualization systems are ideal for labs that need to fully realize complex designs on a shared digital dashboard.

**RESEARCH FACILITIES**

Universities and colleges use Haivision technology to create a fully collaborative research environment, allowing teams to access, share, manipulate, and natively host visual data. The powerful [Alpha FX processing platform](#) renders ultra-high-res images in real-time, significantly improving team efficiency.

**SECURITY OPERATIONS CENTERS**

Security operations for campuses around the country depend on Haivision video walls to bring their IP cameras and security systems into one, singular view of all security operations and responses.
