

Visualization Systems for Public Safety Organizations

Haivision MCS is an industry leader in providing high-performance, custom-built video wall systems. We are committed to delivering complete solutions that are intelligently tailored to the activities, environment, and workflow of the people who will be using them.

UNIFIED INTELLIGENCE FOR SAFER, MORE EFFECTIVE OPERATIONS

Haivision [visualization systems](#) are vital to the work of Public Safety operations. Our solutions are found in Real Time Crime Centers (RTCCs), Emergency Operations Centers (EOCs), and Traffic Management Centers (TMCs) all over the country. Through a Haivision system, these facilities can display incoming data from IP cameras, reporting systems, and analytical tracking tools on a high-resolution video wall. This real-time dashboard assists operators in visualizing crime patterns, responding to emergency situations, and witnessing unfolding events from the scene as they occur. With its user-friendly controls, our system helps first responders work quickly and safely with the best possible intelligence.

As a provider of comprehensive solutions, Haivision will design and deliver your complete video wall – including [displays](#), [processors](#), [software](#), and [support](#). Your new Haivision system will be installed at your facility and expertly integrated into your working environment by our team.

BENEFITS OF OUR COMPREHENSIVE SOLUTION

- Delivers 24/7 reliability
- Reduces incident response time
- Enables swift, accurate decision-making
- Easy-of-use
- Ongoing support and protection
- Growth with your operations

CineMassive (Haivision MCS) was the complete package. They had the video wall itself, they had the controlling system and software, and they had the ability to manipulate the data feeds on the screens.”

LARRY FISHER EMERGENCY COMMUNICATIONS DIRECTOR | MONTGOMERY, AL 911 CALL CENTER

REAL TIME CRIME CENTERS

The common operating picture of a [Real Time Crime Center](#) helps officers and first responders respond to incidents with greater safety and efficiency through enhanced situational awareness.

TRANSPORTATION MANAGEMENT CENTERS

[Traffic management](#) and mass transit centers use IP cameras and traffic monitoring tools to track road conditions, congestion, and incidents as they occur. Through a shared visual dashboard, operators measure and assign resources to keep roads safe and traffic flowing.

EMERGENCY OPERATIONS

[Emergency operations](#) departments across the country depend on the best intelligence from the scene of an incident to make split-second decisions. CineMassive solutions cover both static operations centers as well as mobile, field ready teams.

MOBILE OPERATIONS CENTERS

Mobile field operations demand collaborative decision-making from the front lines of emergency situations. Haivision's [mobile solutions](#) are built for the fast deployment of video walls to serve both military and public safety operations.

911/311 CALL CENTERS

911 and 311 call centers rely on up-to-the-minute decision-making to balance high volumes of incoming calls and dispatch operations to direct resources and first responders in the field.
